

Coasts, harbors, and navigation context

Seven-island maritime reference context • not a navigational chart

Sources: © OpenStreetMap contributors (ODbL 1.0); USGS GNIS; USGS 3DEP (public domain); NOAA NCEI Great Lakes bathymetry (public domain). NTAD route geometry is from 2019; it is not a current schedule, vessel track, safe-passage instruction, or current aid status. OSM features are mapped context (local extract retrieved 2026-07-28); GNIS points are named-place locators. Held 1855/1907 chart scans are source views, not warped overlays.
